SKILLS

Languages:	Python, C++, C, PHP, Java, JavaScript
Frontend:	React.js, HTML5, CSS3, Tailwind CSS
Backend:	Node.js, Express.js, REST APIs
Databases:	MongoDB, MySQL
Tools/Platforms:	Git, GitHub, Vercel, Render, Postman
Core Concepts:	Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, DBMS
Soft Skills:	Problem-solving, Communication, Team Collaboration, Adaptability

PROJECTS

Planora (Personalized Itinerary Builder) <i>React.js, Node.js, Express.js, Tailwind CSS, APIs</i> GitHub Live	May' 26
- Architected an AI-powered travel planning platform leveraging GPT-4o-mini via OpenRouter API to generate personalized real-time itineraries based on destination, budget, duration, and user preferences. - Engineered secure authentication and cloud-based trip management workflows using Firebase Authentication and Firestore, enabling persistent itinerary storage and seamless user experiences. - Integrated interactive maps using React Leaflet and OpenStreetMap along with PDF export functionality using jsPDF and html2canvas to enhance travel visualization and itinerary accessibility.	
Full Stack Blogging Platform <i>React.js, Node.js, Express.js, MongoDB</i> GitHub	Dec' 25
- Built a scalable content publishing platform enabling authenticated users to create, manage, and publish blogs through dynamic full-stack workflows. - Implemented secure authentication, real-time content rendering, and structured database operations to support efficient blog management and seamless navigation. - Enhanced platform usability by developing responsive interfaces and optimized backend routing for improved performance and content accessibility.	
Budget Planner <i>PHP, JavaScript, HTML5, CSS3, MongoDB</i> GitHub Live	Apr' 25
- Developed a responsive personal finance management system enabling users to monitor expenses, manage budgets, and maintain persistent financial records securely. - Integrated authentication mechanisms and dynamic data handling features to support real-time expense tracking and category-based budget analysis. - Improved user engagement through intuitive UI design, structured financial insights, and efficient data management workflows.	

TRAINING

CipherSchools Link	June' 25 – Jul' 25
MERN Stack Training - Strengthened full-stack development skills through hands-on implementation of MongoDB, Express.js, React.js, and Node.js applications. - Built dynamic web applications with CRUD operations, REST APIs, routing, authentication workflows, and responsive user interfaces.	
InternPe Link	Jul' 24 – Aug' 24
Web Development Training - Developed interactive web-based projects using HTML, CSS, JavaScript, and modern UI design principles. - Improved debugging, frontend optimization, and modular development practices through practical project implementation.	

CERTIFICATIONS

ChatGPT-4 Prompt Engineering & LLMs Infosys Springboard Link	Aug' 25
C, OOP, DSA, JAVA Lovely Professional University (iamNeo) Link	May' 24 – May' 25
Introduction to Hardware & Operating Systems IBM Link	Sept' 24
The Bits and Bytes of Computer Networking Google Link	Sept' 24
Responsive Web Design Free Code Camp Link	Nov' 23

ACHIEVEMENTS

- Participated in Smart India Hackathon (SIH) and collaborative hackathons, strengthening problem-solving, teamwork, and rapid development skills. - Contributed as a Communicator at Younity, supporting community engagement, collaboration, and effective coordination initiatives.
